

AI-Based HR Resume Recommender System

MUHAMMAD IMAN HAQIMI BIN ZAIDI
muhammad.zaidi@students.plymouth.ac.uk

BSC (Hons) Computer Science
(Software Engineering)

**UNIVERSITY OF
PLYMOUTH**

PROBLEM STATEMENT

- Manual resume screening is slow and inefficient
- Large applicant volumes cause missed qualified candidates
- Keyword-based systems lack contextual understanding
- Hiring decisions may be biased and inconsistent

OBJECTIVES

- Automate resume screening using AI
- Rank candidates by skills and education
- Support HR decisions with a smart dashboard

TECHNOLOGY STACK

Node.js (Backend Runtime)

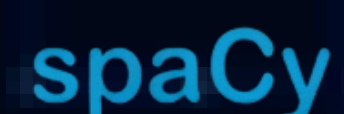

MongoDB (NoSQL Database)

Python (AI & NLP)

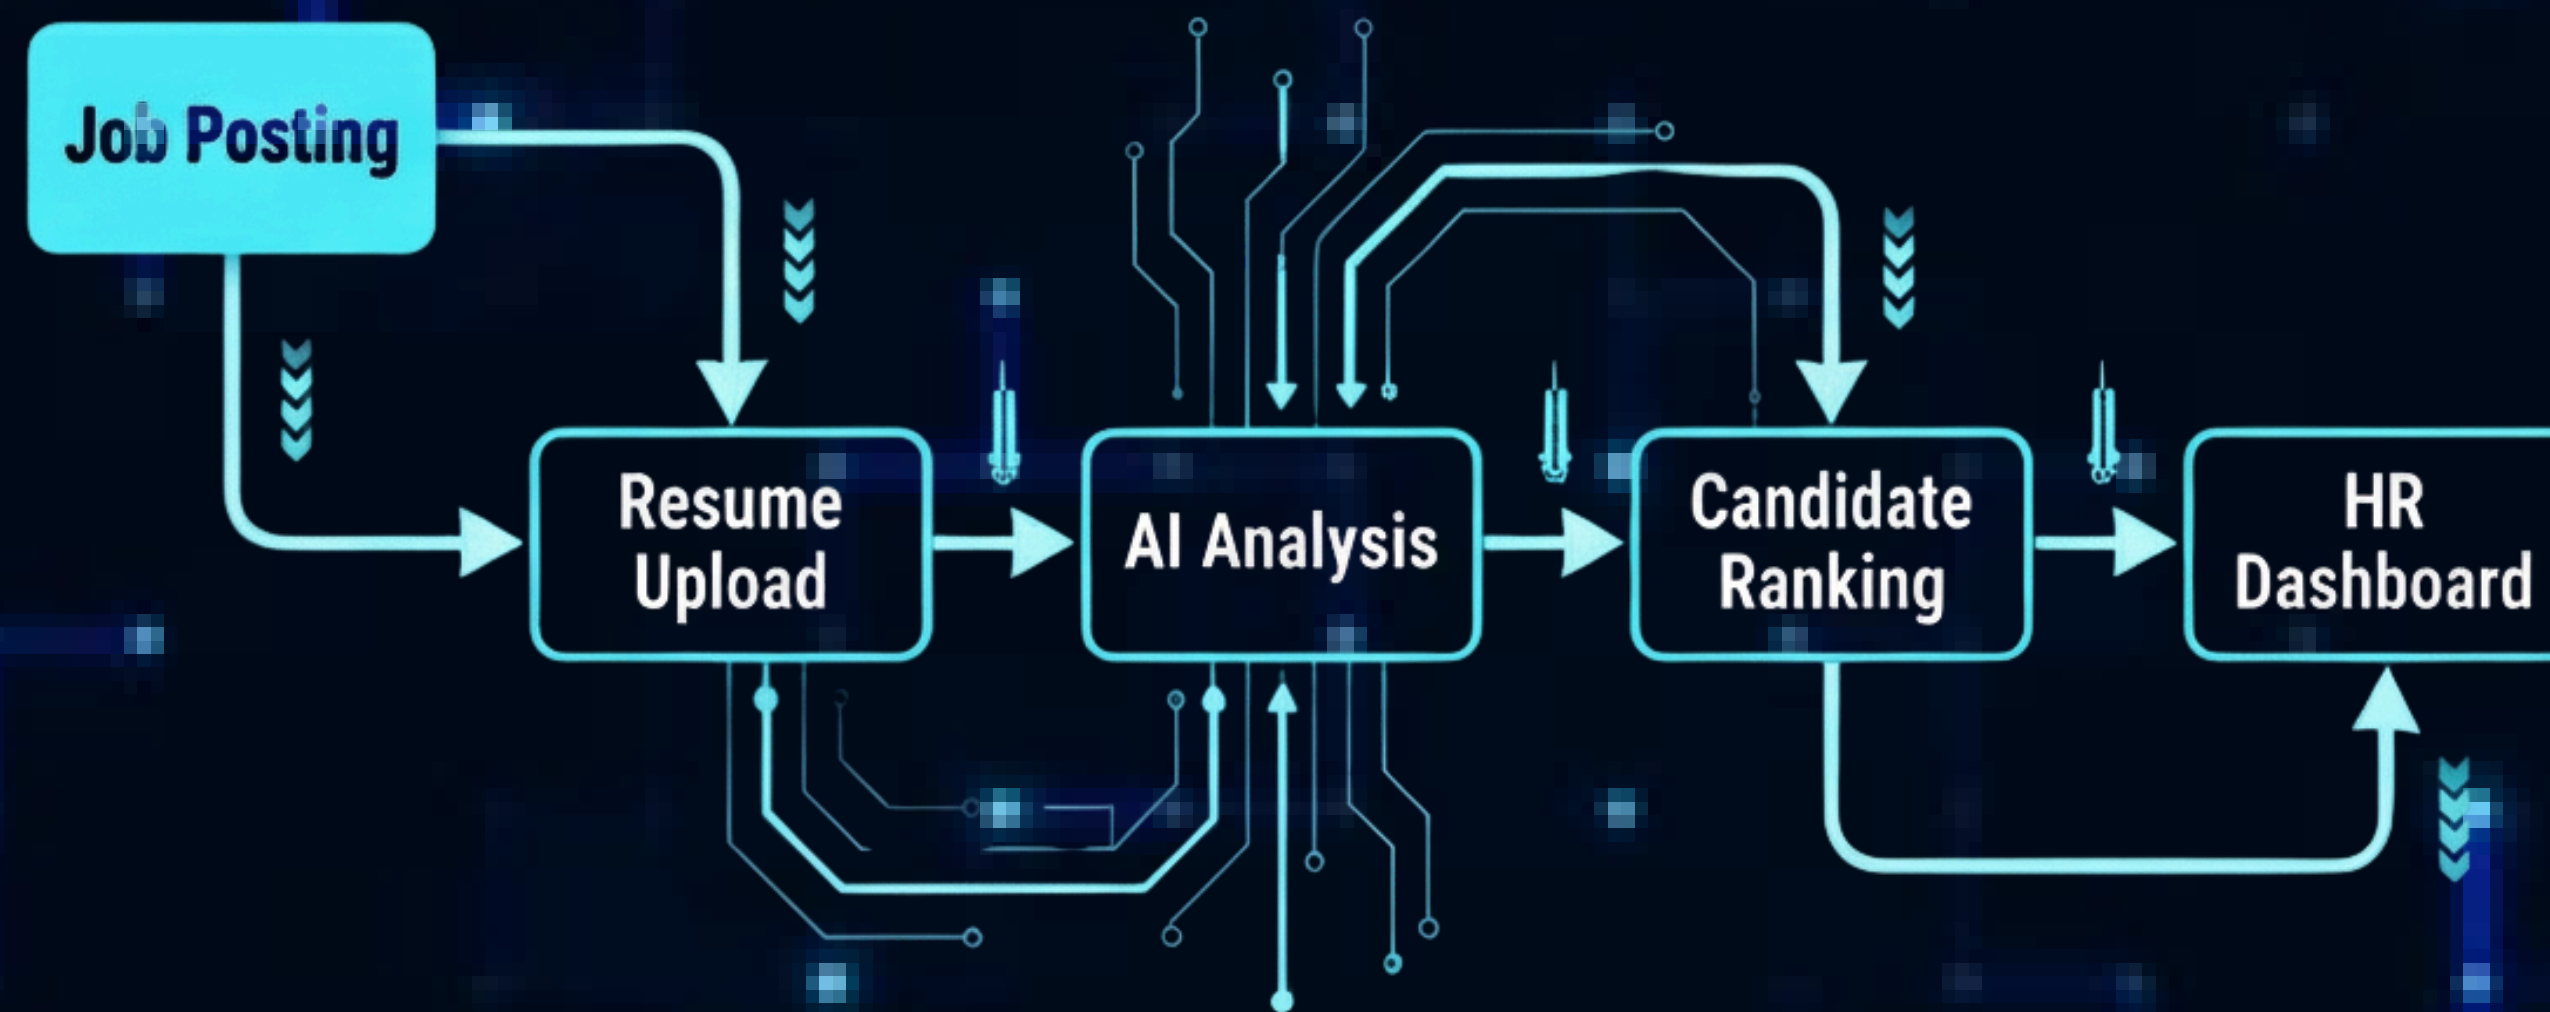

TensorFlow (Machine Learning)

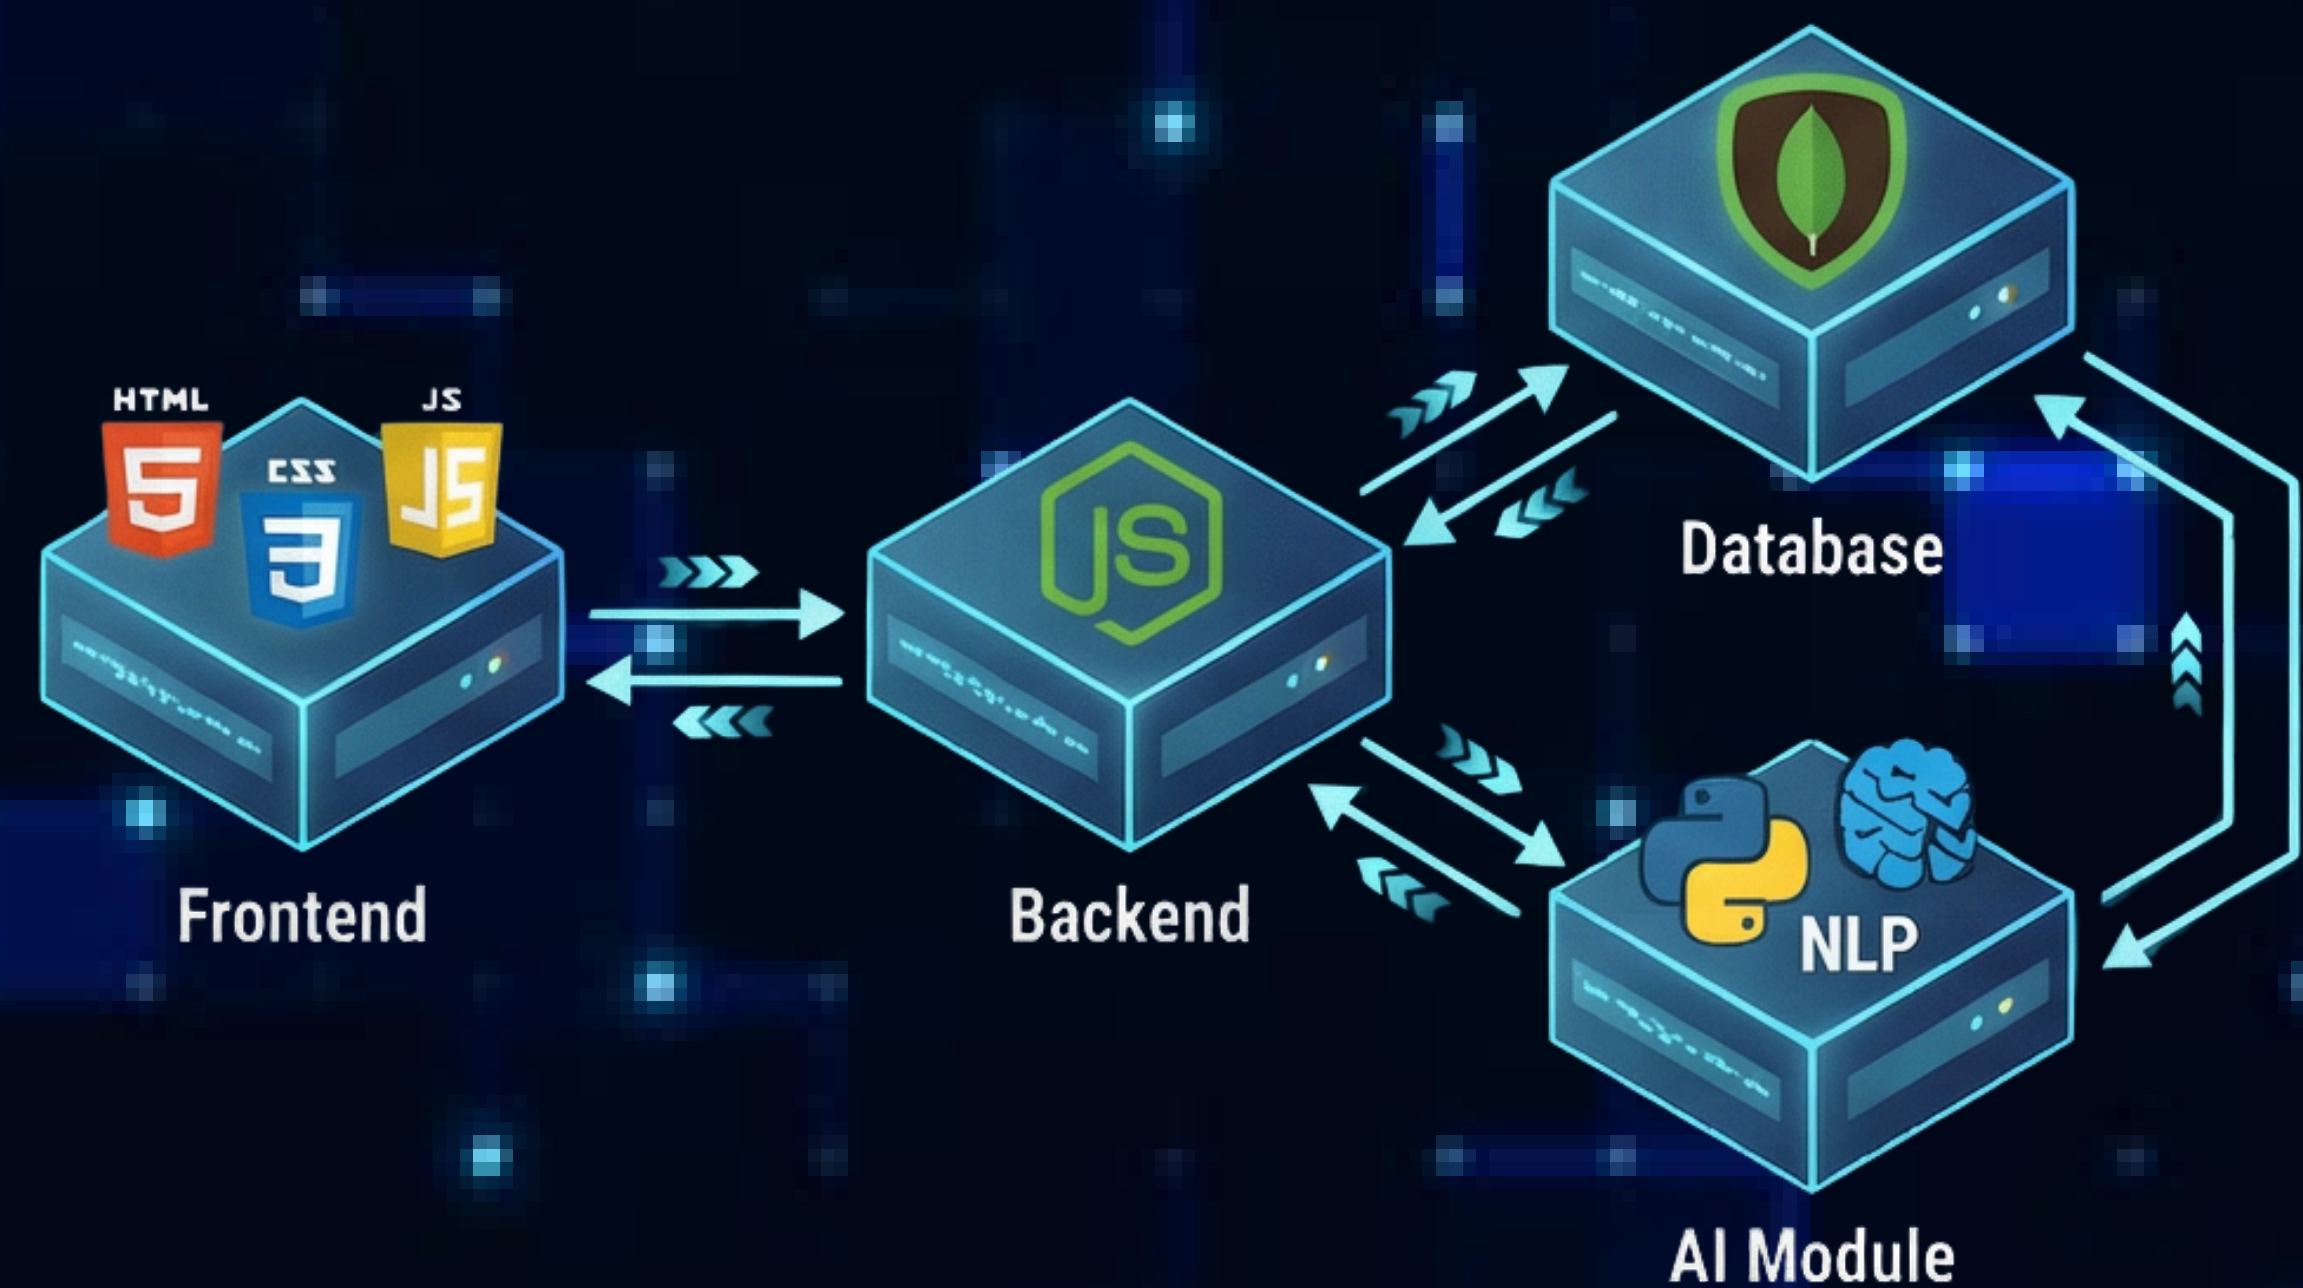

spaCy (Natural Language Processing)
