

UAT Document — AI-Based HR Resume Recommender System

Version: 1.0

Date: 28/03/2026

Prepared by: HR User (Simulated) / Candidate User (Simulated)

1. Purpose

To verify that the AI-Based HR Resume Recommender System meets the expected user requirements for:

- **HR workflow:** job posting, viewing AI-ranked candidates, updating application status, exporting shortlist
- **Candidate workflow:** resume upload, job application, viewing application status and AI match score

2. Test Environment / Setup (for the demo)

- **Backend API:** <http://localhost:5000>
- **Frontend:** <http://localhost:5500>
- **AI module (FastAPI):** <http://localhost:8000>

All services must be running before testing.

3. Test Accounts

HR Account

- Email: hr@test.com
- Password: password123

Candidate Account

- Email: john.doe@test.com
- Password: password123

4. Test Data

Use the demo scenario / test dataset (seed resumes and a sample job) as prepared for demonstration.

5. Instructions for Testers

- Log in using the correct role (HR or Candidate).
- Perform each test case in order.
- Mark result as Pass or Fail.
- Add comments only if something is unclear or incorrect.

6. UAT Test Cases

Table 6.1 — Candidate Portal UAT (Candidate role)

TC ID	Feature	Steps	Expected Result	Result (Pass/Fail)	Comments
C-1	Register/Login	Log in as Candidate	Candidate portal loads successfully	Pass	Candidate successfully logged in and dashboard loaded.
C-2	Resume Upload	Go to profile/resume page and upload a resume	Upload succeeds with confirmation; resume stored	PASS	Resume uploaded successfully and stored in system.
C-3	Browse Jobs	Open jobs page and view available job listings	Job list displays correctly	PASS	Job listings displayed correctly.
C-4	Apply to Job	Select a job and click Apply	Application is created with status Pending	PASS	Application created with status 'Pending'.
C-5	View Application Status	Open “My Applications”	Status shown (Pending / Shortlisted / Rejected) + AI match score visible	PASS	Status displayed correctly with AI match score.

Table 6.2 — HR Portal UAT (HR role)

TC ID	Feature	Steps	Expected Result	Result (Pass/Fail)	Comments
H-1	Login	Log in as HR	HR dashboard loads	PASS	HR dashboard was loaded successfully.
H-2	Manage Jobs	Go to Manage Jobs and view job postings	Jobs list shows correctly (create/edit/delete works if included in demo)	PASS	Job postings displayed and managed correctly.
H-3	View AI-Ranked Candidates	Open candidate ranking page for a job	Candidates appear ranked by match score (descending)	PASS	Candidates ranked correctly based on match score.
H-4	Update Application Status	For at least one candidate, change status to Shortlisted	Status updates successfully and reflects in candidate view	PASS	Status updated to 'Shortlisted' and reflected on candidate side.
H-5	Filter / View Results	Use the status filter or threshold if available	Filter shows the correct candidate subset	PASS	Filter function worked correctly.
H-6	Export CSV	Click Export CSV on the job ranking page	CSV download starts; file contains ranked candidate data	PASS	CSV file downloaded with correct data.
H-7	Dashboard Check	View HR dashboard	Summary cards and charts display without errors	PASS	Dashboard displayed summary and charts without errors.

7. Overall UAT Result

- **Overall Result:** Pass / Fail
- **Any critical issues found?** (Yes/No)
- **Severity:** Minor / Moderate / Critical
- **Summary of feedback:** The system functions as expected. All core features including resume upload, job application, AI-based ranking, and status updates were successfully tested

8. Sign-off

- **Tester Name:** Developer (Stimulated Testing)
- **Signature (optional):** N/A
- **Date:** 28/03/2026
